DETAILED ACTION

1. This office action is in response to the reply filed on 12/30/2009.
2. Claims 1-3, 6-10 and 12-17 are pending in the application and have been examined.
3. For purposes of examination, the "computer readable storage medium" of claim 13 will be interpreted to include only non-transmission type media. This interpretation appears to be consistent with the specification at page 10, lines 7-9.

Allowable Subject Matter

4. Claims 1-3, 6-10 and 12-17 are allowed. Independent claim 1 recites the limitation "an instruction processor arranged to process a first individual instruction extracted from a first instruction word, and at least a second individual instruction extracted from at least a subsequent second instruction word, as a new single instruction word, the instruction processor further arranged to add predetermined control information to said single instruction word, said control information indicating an allocation of said extracted first and at least second individual instructions to said respective functional units and a sequential order of said first and at least second individual instructions at their respective functional units".
5. The examiner's rejections have relied on the fact that the claim requires only that one instruction be sent to each functional unit, and thus an indication of a "sequential order" would be inherent in the prior art (because there is only one possible sequential order for a group of one). In response to this position, applicant argued in the appeal brief submitted on 12/30/2009 that, because the claim requires an indication of a sequential order, the claim implicitly requires that there be multiple instructions executed at each functional unit. Using this interpretation, the

claim implicitly requires at least two instructions at a first functional unit and at least two instructions at a second functional unit (which in turn requires that the instruction word contains at least four instructions). Applicant is correct in stating that, using this interpretation of the claim language, the prior art does not teach the claim. The claim is therefore allowable based on this interpretation. Independent claim 12 recites the same subject matter and is therefore also allowable.
